MEMORANDUM FOR FILES

SUBJECT: Disappearance of Daniel Rus

BH 050

Mr. and Mrs. Rus called on Ambassador Castro on January 27, 1978 regarding their son's disappearance when employed at the CNEA while a student of nuclear physics at the University of Buenos Aires Faculty of Exact Sciences. Mr. Rus had firm information that his son was originally detained at the Navy Mechanic School. This information was provided by a contact in Naval Intelligence, Admiral Casas.

Their son was very close to the family, he was not a Peronista, but had Peronist-idealistic leanings. They have not been able to meet with Admiral Castro Madero to discuss their son's disappearance.

Seven days before their son's disappearance, one of his friends from CNEA was abducted. The same day that their son was taken two other employees from CNEA were abducted.

They have written all the Argentine authorities and would greatly appreciate any efforts which could be made by the USG regarding their son.
